

ARARAT EXTERMINATORS

P.O. BOX 3081, Walnut Creek, CA 94598

<http://www.araratexterminators.com/>

Proudly Serving the Bay Area for Over 35 Years

Ararat Exterminators is a family owned and run pest control company founded in 1974 by Jack Sogomonian who, with his son and daughter, continues to provide the people of Contra Costa County with over three decades of quality pest control experience. We are fully licensed, bonded, insured and have well over three decades of experience working in the pest control industry. Rest assured that you are getting a quality inspection by some of the best inspectors in the business.

Termite Inspections, Repair and Remodeling

Our services extend beyond simply inspecting your house for termites and fungus damage. We are proud to offer complete repair services through an in-house team of contractors. Rather than dealing with the hassle of working with multiple companies to complete needed repairs, we offer you the convenience and simplicity of an all-in-one shop. We can also perform non-pest control related construction projects such as kitchen and bathroom remodel, or simply give you a quote.

We Beat Most Termite Repair Quotes by 10%-20%

Already have a termite report prepared by someone else? Provide us with a copy of an existing report and we'll review the items listed at your property and provide you with a competitive quote, in writing, within 24 hours and, in most cases, a verbal quote on the spot.

We'll Apply Your Inspection Fee toward Cost of Repair

We understand money is tight these days, so we've designed a way to help you reduce some of the costs associated with termite inspection and repair. If you authorize repair work totaling \$1,500.00 or greater and plan to settle your account out of escrow, your inspection fee is on us, leaving you with a little extra spending money.
